

INTERNATIONAL AIR & SEA-FREIGHT, NVOCC
CUSTOMS BROKERAGE, PROJECT LOGISTICS

Silver Jubilee for STAMM INTERNATIONAL.

“Every household needs proper logistics, even God’s natural creation is based on logistical principles” this basic fact has driven the team of STAMM for 25 years. The term “logistics” stands for a much wider dimension than a chain of supply or a transport and distribution concept. The founders, Mrs Doris Torres and Mr Urs Hebeisen always adhered to an “out-of-the-box” thinking pattern and solved quite a few unusual problems. **“We are proud that most of our successful projects have come to us because of trust in the name STAMM”** Mr. Hebeisen, the CoB mentioned. Even though not related, the management team operates like a family and was sticking together in all these years. Whatever the Project is, an **Exhibition** or an **industrial complex**, a **supply chain** or simply a **trade promotion** it is listed on its long record of experience and references. **STAMM** works according to the vision of **“Serving comes before Deserving”** (consulting is for free) and sees its position as a partner rather than a supplier of services. Customer satisfaction at times needs a sacrifice but this is exactly the success pattern of **STAMM** and its 50 employees. Love of country, solidarity and humanity, social responsibility and environmental awareness are not just fashion or empty words in the philosophy of these enthusiastic individuals working at **STAMM**. They **believe** in it and **live** it.
